SAP Analytics Overview

Adapt to the new business reality.

At Protiviti, we judge our success of your Analytics program based on user adoption. It's very simple, if business users aren't using it, it's not successful. We've developed an approach that makes information part of their day. Our most successful customers have shared the attributes of why they've been so successful with Analytics. We've captured those elements and built a proven strategy for implementing an Analytics Center of Excellence.

> *Provided real-time visibility into waste, quality, downtime, overtime, profitability and pounds produced enabling the successful rollout of first company owned plant.*
> **Pet Food Manufacturer**

What We Do

We help clients get the right information, to the right people, at the right time. Our methodology provides a systematic leading practices approach, allowing clients to maximize their analytics investment by growing the adoption of analytics throughout their organization.
